

## GRIPDRY® is a patented product that solves one of the biggest problems golfers have faced since the inception of the game!

If you are among the millions of golfers who play in the wet and early morning dew or right after a rain shower, then you understand the frustration of laying your club down in the grass in between shots or while you're putting, only to pick it up and find that your grip is now wet and slippery.

GRIPDRY protects your club's grip by keeping it elevated above the grass so it remains clean and dry and ready for your next shot. Simply keep the GRIPDRY in your pocket while you play and then just "SNAP IT ON YOUR SHAFT™" before you lay your club down...it's that easy! For ladies (without pockets) you can snap GRIPDRY to any metal surface in your golf cart.

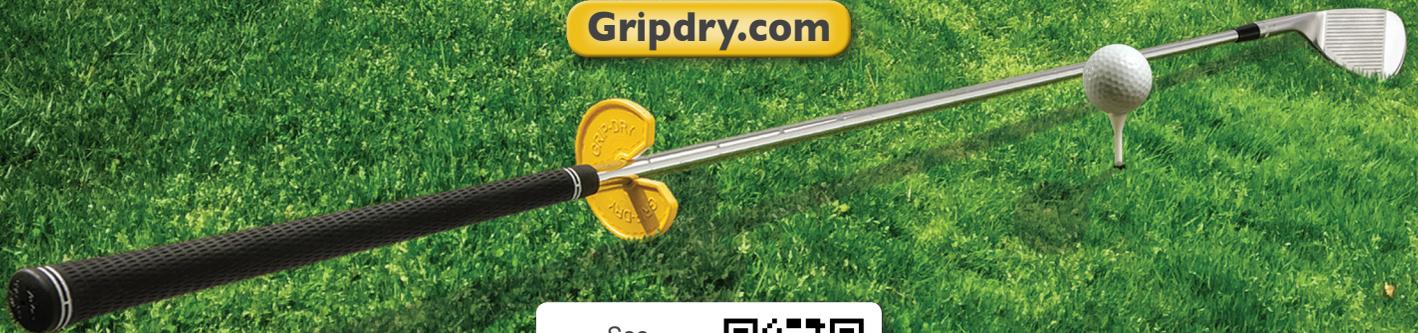

*See Video on Youtube!*

### GRIPDRY PROVIDES ALL THESE GREAT BENEFITS

- **Protects your grips** by keeping them elevated from the wet grass, sand and toxic fertilizers.
- **Saves your back and knees!** No more bending over to push a tee into the ground or pick up your second club. Simply hook another club under the elevated grip... and lift.
- Keeps your clubs in plain view. No more lost wedges left behind on or around the greens. It's your "no club left behind" tool.
- Made from **durable** impact grade plastic.
- Provides a convenient place to store your ball marker. **No more searching** in your pockets so you can mark your ball on the green.
- **Great gift item** for golf outings and corporate events.
- Single or multi-color **logo customization** available in quantities.
